

John Doe - Senior Fullstack Engineer

Professional Summary Experienced software engineer with over 5 years of experience in building scalable web applications. Proficient in designing and implementing complex systems using modern technologies. Passionate about writing clean, maintainable code following SOLID principles, OOP, and Design Pattern methodologies. Familiar with Agile and Scrum development processes.

Technical Skills

- **Frontend:** JavaScript, TypeScript, React, NextJS, HTML, CSS, Tailwind.
- **Backend:** NodeJS, NestJS, Express, Python.
- **Databases:** PostgreSQL, MongoDB, Redis.
- **Cloud & DevOps:** Docker, Kubernetes, AWS, Git, CI/CD, Github Actions.
- **Architecture:** REST API, Microservices, Serverless, GraphQL.

Professional Experience Senior Fullstack Developer | Tech Solutions Inc. | 2020 - Present

- Architected and developed a high-traffic e-commerce platform using React and NextJS for the frontend, ensuring high performance and SEO optimization.
- Built robust backend services using NodeJS and NestJS, implementing a Microservices architecture to handle high transaction volumes.
- Designed relational database schemas using PostgreSQL and implemented caching layers with Redis to improve response times by 40%.
- Containerized applications using Docker and orchestrated deployments with Kubernetes on AWS infrastructure.
- Set up Continuous Integration and Continuous Deployment (CI/CD) pipelines using Github Actions, reducing deployment time by 60%.
- Collaborated closely with cross-functional teams in an Agile environment, participating in daily Scrum meetings and sprint planning.

Education Bachelor of Science in Computer Science | University of Technology | 2016 - 2020
